

OWR1

POWER: 2000W, 3000W Voltage: 230V Thread 5/4 inch ; 6/4 inch

Designed for:

- heat exchangers depending on the needs from 80 to 150l
- solar collectors as an alternative energy source
- reliable heat source in photovoltaic installations

Heater OWR1:

- meet the strictest safety standards (IEC 60335-1, CE declaration, international CB safety certificate)
 - tightness class: IP 44
 - has a mechanical reset button
 - the practical use of the heaters is to support the heating of water in exchangers during the heating season and independent heating of water outside the season.
 - is equipped with a high-class single-phase thermostat (temperature control 30°C- 70°C) with a double, independent safety system
 - there is an option of galvanic coating (Nickel) of the heating element
-
